

## Explorer Functional Check Protocol

<b>Serial Number</b>
<b>Date</b>
<b>Location</b>

This document lists checks to ensure RootWave Pro Explorer has completed the trip from storage to site without incurring any damage.

Vehicle charging, generator fuel and storage box contents will have been checked before setting out. Routine maintenance will have been carried out as per schedule. The machine will have been cleaned and checked following previous use.

### Vehicle checks

Before unloading from trailer perform checks 1 and 2. Check 3 involves driving the vehicle from the trailer.

**If there is any damage that could affect control or safety, or if anything doesn't function as expected, then contact your RootWave supplier.**

Step	Action	Response	Tick
1	<p><b>Storage</b></p> <p>Check no signs that machine has shifted or undergone any impact during transportation. Untie machine in trailer. Check storage box lids are in place, Treatment Lance and any tools are secure and nothing has come free. Check no signs of damage to Treatment Lance and Power Module. Check Treatment Lance lanyard is not dangling down.</p>	<p>Reposition stored items and re-secure.</p> <p>Contact your RootWave supplier if any signs of damage.</p>	
2	<p><b>Loose parts and damage</b></p> <p>Check vehicle for loose parts and visually inspect for damage.</p> <p>Check under platform that 2x dumper retaining fasters are secure.</p> 	<p>Tighten any loose screws, bolts, nuts or fasteners.</p> <p>Contact your RootWave supplier if any signs of damage.</p>
